AMAN SHARMA

AI ENGINEER · AI CONSULTANT · AI FULL STACK DEVELOPER

Generative AI · LLMs · Computer Vision · AI Automation

New Delhi, India · +91 98715 93676 · aman49420@gmail.com · linkedin.com/in/amansharmavb

PROFESSIONAL SUMMARY

AI Engineer with 5 years' experience taking AI systems from problem to production, currently building national-scale Generative AI and computer vision platforms for India's **Ministry of Electronics & Information Technology (MeitY)**. Shipped **four production AI systems in 14 months**, among them a deepfake detection pipeline for public digital platforms and an LLM-powered policy dashboard used by leadership across central government. Previously delivered **8 AI MVPs** at a venture studio, mentoring **120+ founders** and supporting **₹40 Cr+** in activated startup investment. Works end to end across problem framing, model selection, build, deployment and stakeholder handover.

4 production AI systems shipped **8** AI MVPs delivered **120+** founders mentored **₹40 Cr+** investment supported

TECHNICAL SKILLS

Programming Python · JavaScript · SQL · HTML · CSS

Generative AI & LLMs Large language models · open-source LLMs · prompt engineering · natural language query interfaces · automated summarisation with LLMs · AI content classification · retrieval over internal document stores

Computer Vision Image classification · object detection · geospatial and satellite imagery analysis · deepfake and synthetic-media detection · CNNs

Machine Learning Model training and evaluation · classification models · NLP · sentiment and trend analysis

Automation & Integration n8n · Make · Zapier · HubSpot · multi-source data pipelines · third-party API integration

Data & Visualisation BI dashboards · social media profile and content analytics · data aggregation · automated reporting

Cloud, Tools & Systems AWS · Git · Linux · Kali Linux

Delivery AI full stack development · end-to-end AI product delivery (concept → MVP → production) · technical documentation · cross-functional and government stakeholder management

PROFESSIONAL EXPERIENCE

Press Information Bureau, MeitY

Jul 2025 – Present

Young Professional · *Office of the Hon'ble Minister for Electronics & IT · New Delhi*

Designed, built and deployed four production AI systems under the APS to the Hon'ble Minister:

- **Deepfake & AI-Content Detection (MeitY)**: Designed and deployed MeitY's system for identifying deepfake and AI-altered media across public digital platforms, combining content classification, metadata extraction, contextual analysis and flagging logic on open-source LLMs.

  Stack: Python · open-source LLMs · classification models · metadata extraction

- **Railway Land Encroachment Detector (Ministry of Railways)**: Engineered a computer vision and geospatial imagery system that detects encroachment on railway land nationwide, replacing manual field surveys with continuous automated monitoring.

  Stack: Python · computer vision · geospatial / satellite imagery analysis

- **National MeitY Policy Dashboard**: Shipped a single-view dashboard tracking every active MeitY policy and scheme across all Indian states. An embedded LLM layer lets leadership query departmental data in plain English and returns automated policy-status summaries, removing the analyst round trip for ad hoc requests.

  Stack: Python · LLM natural-language querying · BI dashboarding · multi-source data aggregation

- **AI SaaS for Social Media Profile and Content Analysis**: Delivered a platform that analyses profiles and content across multiple social platforms, covering automated content tracking, profile-level and post-level analysis, sentiment and trend detection, and one-click generation of stakeholder-ready reports.

  Stack: Python · NLP · sentiment and trend analysis · social media data pipelines · n8n automation workflows

- **Delivery and coordination**: Prototype on n8n automation workflows integrating multiple data sources; author technical documentation and leadership briefs; align engineering teams, policy stakeholders and implementation partners to land AI components on schedule.

Favcy Venture Builders
Sep 2023 – Feb 2025

AI Product & MVP Lead (Assistant Manager)

- Launched **BuilderX**, the firm's AI venture-building product, shipping **8 AI MVPs** from concept to deployment and mentoring **120+ early-stage founders** on AI architecture and build decisions.
- Supported **5 startup investments worth ₹40 Cr+** through technical validation and MVP delivery.
- Conceptualised and launched **Favcy Capital**, the firm's investment-banking arm; onboarded **80+ investors** and matched them to validated startup deals.
- Automated lead generation end to end with Zapier and HubSpot, unifying website and social-channel leads into a single CRM pipeline.
- Co-built AI-powered founder-onboarding tools that cut founder wait times.

Filmagic
Feb 2025 – Jul 2025

Project Growth Manager

- Designed and shipped a **web application** supporting content workflows, campaign tracking and user interaction.
- Designed and launched an original content series, growing the brand from **0 to 900+ followers in 45 days**.

MSMEX
Oct 2022 – Sep 2023

Business Operations Executive

- Generated **₹7.5 L profit** by renegotiating contracts and optimising service workflows; managed operations, listings and scheduling for **100+ experts**.

MATLA Medical Solutions
Aug 2021 – May 2022

Customer Relationship Executive

- Maintained **95% retention across 100+ key accounts** using CRM analytics; improved operational efficiency and upsell performance by **20%**.

EDUCATION

B.Tech, Information Technology · Noida International University, Uttar Pradesh — 2017 – 2021

CERTIFICATIONS

- **Machine Learning & AI with IoT on AWS; CNN Classification Models** · Finland Labs (2021)
- **Full Stack Development** · Udemy (2022)
- **AI Strategy & Product Building** · Favcy BuilderX (2024)
